Experience

Amazon
System Development Engineer Intern

Bangalore, India
May 2026 – July 2026

- Built proactive monitoring and observability for **EPIC (Everyday Peak In Charge)**, a peak capacity-planning and auto-scaling platform — shifting the team from reactive detection via customer complaints to proactive alerting using CloudWatch dashboards, alarms, metric filters, and automated ticketing.
- Authored CloudWatch alarms and metric filters as infrastructure-as-code using AWS CDK across Beta, Gamma, and Production environments, enabling real-time visibility into service health and workflow execution.
- Developed backend components in **Java and TypeScript/Node.js**, integrating S3, EventBridge, API Gateway, Lambda, SQS, SNS, and DynamoDB.

Projects
